BALLOONS

Envelope kits include all materials like fabric (ultra lightweight nylon or polyester and Nomex), vertical and horizontal load webbings, parachute lines, velcros, pulleys, vent chord, flying wires (factory assembled) and karabiners, temperature labels, flag and melting link. Envelope's Quick Bag included. Only the sewing thread is optional.

For each size of envelope, there are 2 type of kits available with a different level of factory pre-assembly:

BASIC KIT (25% PRE-BUILT)

Panels are delivered pre-cut but no sewing between them is realized. Details like winglets or velcros for parachute are already factory sewn on the concerned panels. Parachute and scoop are delivered factory assembled.

QUICK-BUILD KIT (49% PRE-BUILT)

As above, but gores are factory sewn. Builder has to join and sew all gores together, add the vertical load webbings, add the bottom, top, equator and upper third horizontal webbing reinforcements, and all internal details.

SIZES AVAILABLE

Our range is constantly increasing, please ask if you don't find your wished size here.

	Volume	Gores	Pax
WeDOO1200	1200 m ³ / 42000 ft ³	12	1/2
